OPTIMUM

EXCEPTIONAL QUALITY AND TIMELESS ELEGANCE

WWW.PIRNAR.CO.UK

PIRNAR'S **HERITAGE**

We take pride in our heritage. From our initial steps in the family workshop onward, we are driven by a passion for creation and a commitment to excellence in design and craftsmanship, which has been passed down through generations. We continuously enhance our expertise and combine it with modern technologies. Strong roots maintain our connection to tradition, while courage and boldness push the boundaries of possibility, guiding us to new successes. With a clear vision and an innovative approach, we exceed expectations and set new milestones globally in the realm of building furnishings.

OPTIMUM

A UNIQUE ENTRY COLLECTION WITH GREAT
ADDED VALUE, EXCEPTIONAL QUALITY,
DURABILITY, AND TIMELESS ELEGANCE

Optimum is Pirnar's entry collection of exquisite aluminum entrance doors, characterized by outstanding quality, durability, and thoughtfully designed options. With a carefully selected range of models, top-tier functionalities, and materials, it offers the ideal choice that creates timeless elegance on either a traditional or modern house. The unique added value of the Optimum line lies in the state-of-the-art management options for the entrance doors.

DOORS THAT SEAL LIKE A WALL

THE UNIQUE CARBON DOOR CONSTRUCTION CARBONCORE

The heart of every premium entrance door is its construction. CarbonCore is a unique patented carbon construction made exclusively for entrance doors. Carbon fibres are exceptionally lightweight, rigid, and several times stronger than steel. With CarbonCore profiles, we significantly minimize door warping, whether in scorching sun or the coldest winters. This construction enables the development of innovative design and functional solutions for Pirnar's entrance doors.

OPTIMUM CARBONCORE **LEVEL**

- ✓ RECORD-SEALING
- ✓ SUPERIOR THERMAL AND ACOUSTIC INSULATION
- ✓ EXCEPTIONAL STABILITY WITHOUT WARPING
- ✓ THE STRONGEST YET LIGHTWEIGHT CONSTRUCTION
- ✓ PRODUCT DURABILITY

Thermal transmittance	from 0,83 W/(m ² K) from 0,75 W/(m ² K) (with additional insulation)	from 0,83 W/(m ² K) from 0,75 W/(m ² K) (with additional insulation)
Door frame thickness	83 mm	93 mm
Door leaf thickness	81 mm	81 mm
Thermal glazing	Triple glazing	Triple glazing

RECORD-SEALING

MAGNET WEATHERSEAL

CarbonCore features advanced sealing with Magnet WeatherSeal, which has earned the doors an exceptional watertightness rating of 9A in testing laboratories, preserving complete waterproofing even at a pressure of 600 Pa, corresponding to a wind speed of 114 km/h. This represents a sixfold higher load than what regular entrance doors can withstand.

UPGRADE

SOUND INSULATION

SOUNDCORE

The best solution for homes in urban neighborhoods.

SoundCore is premium sound insulation for residential houses in urban areas, featuring a filling density of 900 kg/m³ in the door leaf. In combination with superior sealing, it reduces the sound load in living spaces by more than 18 times compared to fully open doors. The intensity of sound passing through the entrance door is significantly reduced compared to values found in ordinary entrance doors.

Thermal transmittance

U_d = from 0,88 W/(m²K)

Soundproofing

Rw (C; Ctr) = to 43 (-1; -4) dB

LIVE SMARTER AND SAFER

COMPLETE SAFETY AND COMFORT

Pirnar offers state-of-the-art solutions and the finest products for complete safety and comfort.

You can unlock the entrance doors using the smart SecuroSmart system or the SecuroSmart Keypad in the Pirnar mobile app, as well as with a fingerprint reader.

Combined with the premium locking system Armo Comfort Electro Plus, you will ensure that your home is a fortress of safety and peace.

* The RC2 package is standardly available for single-leaf door configurations with a solid door leaf, dimensions up to 1250 x 2400 mm, without toplights or sidelights. For designs with glass in the door leaf featuring sidelights, toplights, or separate sidelights, the RC2 package is available as an additional option.

1. FINGERPRINT READER

This modern and popular method of unlocking doors with a fingerprint reader provides enhanced security and, above all, a simpler and more comfortable entry for your entire family, as you can store fingerprints of multiple selected individuals simultaneously. Forget about keys and concerns.

2. SECUROSMART KEYPAD

The modern keypad allows for unlocking with various PIN codes tailored to specific living needs and unlocking with an RFID card. It features a fingerprint reader and doorbell, managed via the Pirnar mobile app.

3. SMART MANAGEMENT SECUROSMART

The smart SecuroSmart system in the Pirnar mobile app boasts premium functionalities for easy and secure door usage. Even if you are on the other side of the world, you can easily unlock your doors.

4. CONCEALED HINGES

Concealed hinges are an essential security element of Pirnar's entrance doors, renowned for their extraordinary robustness and durability. They not only provide an elegant appearance but also function as a security bolt that effectively prevents the lifting of the door or its forcible removal from the frame.

5. ARMO COMFORT ELECTRO LOCK AND ARMO COMFORT ELECTRO PLUS

The premium multi-point lock allows for motorized unlocking without a key and automatic mechanical locking. It is compatible with remote unlocking systems and fingerprint reader. The door with this lock achieves burglar resistance RC2 according to EN 1627 for RC. The Armo Comfort Electro Plus lock offers a fully motorized solution for secure, comfortable, and modern use of entrance doors. It operates without manual locking and allows controlled access with advanced safety features.

UNIQUE ON THE MARKET

CREATING AMBIENCE WITH ELEGANT LIGHTING

Pirnar's solutions for creating a comfortable atmosphere facilitate the management of lighting for entrance doors at thresholds, pull handles or lever handles. With the smart SmartLux system in the Pirnar mobile app, you can adjust the intensity, colour, temperature, and timing of the lighting. Manual control of the light remains an option, allowing you to modify the intensity, colour, and temperature of the illumination.

SMARTLUX LIGHTING PACKAGE*

Lighting is available on handles and thresholds, allowing you to create a refined ambience.

Time setting for LED lighting

Wi-Fi and Bluetooth connectivity

Remote management

Voice control with integration of Google Assistant and Amazon Alexa

Temperature control of led light from 2700 Kelvin (warm white) to 6500 Kelvin (cool white)

The SMARTLUX system is compatible with many popular smart home solutions.

* The lighting for the entrance doors is exclusively available as part of a package; individual lighting elements cannot be ordered separately. If you choose not to use specific lighting, you can easily turn it off using the Pirnar mobile app.

UNIQUE PERSONALIZATION OPTIONS

EXCEPTIONAL PULL HANDLES

The pull handle is one of the most personal elements of a door. Every resident touches it at least a thousand times a year, which is why we at Pirnar dedicate considerable attention to it. Each model has a specific selection of basic shapes, either round or angular, with an exact length determined. For the best impression and personal touch, we have created several series of unique illuminated pull handle upgrades using patented technology, awarded the prestigious international German Design Award Special 2019.

LENGTHS OF ROUND AND ANGULAR PULL HANDLES

For additional information on the full range of available pull handles and lighting upgrades, please consult our sales staff.

SMARTLUX

Subtle ambient lighting from behind the pull handle evokes a feeling of elegance, safety, and warmth at home.

LABELUX

Pinar's patented technology allows your surname or any desired inscription to shine in the middle of the pull handle, perfectly aligned with the surface.

WARRANTY

Pirnar aluminium entrance doors come with a 10-year warranty – a clear commitment to quality, durability, and a peace of mind. This extended cover protects your investment and reflects the outstanding performance of every Pirnar entrance door.

10 years:

- Door functionality
- The durability of the powder-coated aluminium surface of the doors, including resistance to cracking, peeling, and excessive fading of the coating under normal environmental conditions

5 years:

- For the airtightness of thermal insulating glass
- The visual consistency of the glass with the EN 1279:2018 standard

2 years:

- For issues pertaining to the performance of the door's built-in hardware (lock, cylinder, handle, self-closing mechanism, handles)
- For the performance of electronic components

The full warranty terms and conditions can be found at www.pirnar.co.uk.

Pirnar models are protected by copyright. We reserve the right to change prices, technical specifications, and equipment without prior notice. Due to technical printing reasons, variations in color or glass may occur. Please verify colors according to the applicable RAL color chart. The painted surfaces of Pirnar doors are colorfast due to special treatment.
